Mr Greg Butler
Project Services Manager
NSW Roads and Traffic Authority
Locked Bag 928
NORTH SYDNEY NSW 2059

Attention: Nicholas Francesconi

Dear Mr Butler

M2 Upgrade (MP 09_0049) – Condition 2.52 Ancillary Facility: Main Construction Compound

I refer to the RTA's correspondence dated 22 December 2010, requesting the Director General's approval to establish the Main Construction Compound (located on the corner of Delhi Road and the M2 Motorway at North Ryde) and subsequent correspondence dated 23 December 2010.

The Department has reviewed the above information, and is satisfied that the proposed management and mitigation measures would minimise environmental impacts from the construction and operation of the main construction compound. Therefore, the Director General, in accordance with condition 2.52, approves the construction and operation of the ancillary facility on the corner of Delhi Road and the M2 Motorway at North Ryde, subject to the following:

1. Construction and operation of the Ancillary facility in accordance with the document titled Main Construction Compound Environmental Assessment & Management Plan (dated 23 December 2010, revision 1), by Leighton Contractors Pty Ltd; and
2. Rock crushing and screening activities are not permitted. Prior to any approval of these activities, you are requested to provide the Department with further details in the noise assessment of these activities.

Should you require any additional information, please do not hesitate to contact Mark Turner on the above contact details.

Yours sincerely

Daniel Keary
Director
Infrastructure Projects
as delegate of the Director-General
