Dear resident,

Re: Barclay Road compound establishment

The Hills M2 Upgrade will widen the existing motorway generally between Windsor Road, Baulkham Hills and Lane Cove Road, North Ryde and will deliver four new ramps to improve access to the motorway. The project aims to provide efficient and integrated transport for the community of Sydney's North-West.

Major work started in January 2011 and is expected to take approximately two years to complete. Part of this work will require lengthening of Barclay Road Bridge that crosses over the motorway. A compound is required for this work.

Work to set up the Barclay Road compound site will start in the week beginning 28 March. The compound will be located at the corner of Barclay Road and Perry Street, North Rocks. Access to the compound will be from Perry Street, refer to the map shown over the page.

The compound will be used for the duration of the project and will be used to store equipment and materials, provide site amenities and car parking for workers (10 spaces only).

Work to set up the compound will take about 6 weeks and will be undertaken during standard construction hours, Monday to Friday from 7am to 6pm and Saturday from 8am to 1pm. If night work is required a separate notification will be provided to potentially affected residents with dates and details at least seven days prior to start of these works.

This compound will be in use infrequently on a 24 hours basis for the duration of the project. During the night, activities would mainly be routine office operations and the movements of light vehicles to and from the site.

Work to set up the site will include:

- Installation of erosion and sediment controls.
- Erecting a safety fence around the site.
- Clearing of work area and earthworks.
- Installation of services and lighting.
- Setting up of temporary office buildings.

Clearing of vegetation at the site will be minimised by retaining mature trees wherever possible. Once construction is complete, the site will be replanted to at least the same condition prior to clearing.

The community information line 1800 196 266 will be attended during the day and night during construction. Complaints received will be responded to within two hours and investigation of the complaint will proceed at the earliest opportunity. If you have a question or would like to provide feedback please contact the project team on the project 1800 number or email enquiries@hillsm2upgrade.com.au

Kind regards

Sanjin Muhic
