

24 March 2011

Our reference: Busaco_NW_E_3001_OHW_AN_1

Dear resident,

Night work to build **temporary** noise wall at Busaco Road Bridge commencing 5 April

The Hills M2 Upgrade will widen the existing motorway between Windsor Road, Baulkham Hills and Lane Cove Road, North Ryde and will deliver four new ramps to improve access to the motorway. We aim to provide an efficient and integrated transport for the community of Sydney's North-West. Major work started in January 2011 and is expected to take around two years to complete.

This night work involves construction of a temporary noise wall, extending 50m east and 150m west of the Busaco Road Bridge, on the eastbound carriageway of the motorway.

What is happening with the noise wall at this location?

1. A new temporary noise wall will be built in sections on the eastbound carriageway. The temporary noise wall will be located closer to the motorway. Please note that the temporary noise wall will not be located in the same position as the permanent noise wall.
2. As each temporary section of the noise wall is completed, the corresponding section of the existing noise wall will be removed.
3. The new permanent noise wall will be constructed around December 2011 following the completion of widening work near Busaco Road Bridge. The new permanent noise wall will be increased in height at this location.

Why can't the new permanent noise wall be constructed now?

The new permanent noise walls at this location cannot be built until widening work is completed.

Some of this work requires lane closures at night due to the high volume of traffic during daytime peak periods. Approved hours of night works are from 8pm to 5am. Night work will take place on the dates shown over the page.

The following equipment will be used:

- Light vehicles
- Small tools and generators
- Lights

You may experience increased noise levels during this work. We will take measures to keep this to a minimum, including:

- Using non-tonal reversing alarms, which make a "quacking" sound instead of a "beeping" sound.
- Shrouding all stationary equipment and using hoarding where possible.

For more information about how we will manage noise, please refer to the *M2 Upgrade Noise Management Fact Sheet* which is available on the project website www.hillsm2upgrade.com.au

Hills M2 Upgrade
breakdown safety

In the case of breakdown:

- Stay in your vehicle
- Switch on your hazard lights
- Call **1800 196 266**
- Wait for assistance

The community information line 1800 196 266 will be attended day and night during construction. Complaints received will be responded to within two hours and we will investigate the complaint as soon as possible. If you have any questions or would like to provide feedback please contact us on the 1800 number or email enquiries@hillsm2upgrade.com.au.

Kind regards

Sanjin Muhic

Hills M2 Upgrade Community Relations Manager
