Traffic management - proposed night work early notification: January 2011

Dear Resident,

The M2 Upgrade will widen the existing motorway between Windsor Road, Baulkham Hills and Lane Cove Road, North Ryde and will deliver four new ramps to improve access to the motorway. The project aims to provide efficient and integrated transport for the North-West Sydney community. Major work is expected to commence in early 2011 and will take approximately two years to complete.

The M2 Motorway is an important part of the overall Sydney road and transport network. This means that the motorway must still operate during the construction work. It is not permitted to close lanes to carry out construction work between 5am and 8pm. The need to maintain traffic flow, protect road users and construction workers means that some work must be undertaken after 8pm when traffic volumes are low. This will occur over the two year construction program.

Along the motorway, we are proposing the following night work:

- Temporary crossovers along the M2 to allow motorists to travel in both directions on one carriageway. This will allow work to be carried out safely on the other carriageway.
- Installation of concrete traffic barriers and new line marking.
- New temporary pavement at the bus stops on the M2 to allow the bus tidal lane to operate.
- Preparation for widening the tunnel including installing noise curtain at the entrances and exit and relocating services.

Subject to approval a further notification indicating the location, dates and wet weather contingency dates will be distributed at least 5 days prior to the start of night work in your area. Proposed hours of work are from 8 pm until 5.30 am.

You may experience increased noise as a result of this work however the project team will make every effort to keep this to a minimum. We will contact you to provide further information if we expect the level of noise at your residence is likely to be high.

Machinery and equipment that will be used includes: lights, generator, saw cutting machine, excavator (10 tonne with breaker), tipper trucks, water tankers, road sweeper, roller, concrete truck, core drill, mobile crane and delivery trucks.

The information/complaints line 1800 196 266 will be attended during the day and night during construction. Complaints received via the 1800 number will be responded to within two hours and investigation of the complaint will proceed at the earliest opportunity. If you have any questions or would like to provide feedback please contact the project team on the project number 1800 196 266 or email enquiries@hillsm2upgrade.com.au

Kind regards

M2 Upgrade Community Relations Team
