

19 September 2011

Our reference: N0140

Dear resident,

Re: Night work on the M2 near Terrys Creek Bridge commencing 26 September

The Hills M2 Upgrade will widen the existing motorway generally between Windsor Road, Baulkham Hills and Lane Cove Road, North Ryde and will deliver four new ramps to improve access to the motorway. The project aims to provide efficient and integrated transport for the community of Sydney's North-West. Major work started in January 2011 and is expected to take approximately two years to complete.

A temporary noise wall extending approximately 100m will be constructed on the eastbound carriageway of the motorway west of Terrys Creek Bridge, North Epping. Traffic management will be implemented at this location in the week commencing 26 September before the temporary noise wall work commences on 28 September, see dates over the page.

What is happening with the noise wall at this location?

1. A new temporary noise wall will be constructed west of Terrys Creek Bridge on the eastbound carriageway of the motorway. The temporary noise wall will be located on the motorway side of the existing noise wall. The temporary noise wall will be approximately 3.3m high and will be of timber construction.
2. After the temporary noise wall is built, the existing noise wall will be removed to allow for motorway and bridge widening work to take place.
3. The new permanent noise wall at this location will be constructed around December 2011. The new permanent noise wall will be made of similar materials and will be between 4.8m and 5.2m in height.

Why can't the new permanent noise wall be constructed now?

The new permanent noise wall at this location cannot be built until work to build retaining walls and widen Terrys Creek Bridge is complete.

Traffic changes

The left-hand lane of the eastbound carriageway will be closed from 8pm to 5.30am on the dates shown over the page. Traffic passing the work zone will be limited to 40km/h.

The following equipment will be used:

- Light vehicles
- Small tools and generators
- Lights

You may experience increased noise levels during this work. We will take measures to keep this to a minimum, including:

- Using non-tonal reversing alarms, which make a "quacking" sound instead of a "beeping" sound.
- Shrouding all stationary equipment and using hoarding where possible.

SPEEDING KILLS ROADWORKERS TOO.
Slow down at worksites.

Hills M2 Upgrade

For more information about how we will manage noise, please refer to the *Hills M2 Upgrade Noise Management Fact Sheet* which is available on the project website www.hillsm2upgrade.com.au

The community complaints and information line 1800 196 266 (select option 2) will be attended day and night during construction. Complaints received will be responded to within two hours and investigation of the complaint will proceed at the earliest opportunity. If you have any questions or would like to provide feedback please contact the project team on the 1800 number or email enquiries@hillsm2upgrade.com.au.

Kind regards

Sanjin Muhic

Hills M2 Upgrade Community Relations Manager
